

We are looking for a Security Analyst to join our team, in this role you will be working alongside the Cyber Security Manager on one of our client sites and assisting them in the day-to-day management of the Cyber Security portfolio. If you are looking to work with a high calibre team, we want to hear from you.

The Project Foundry has substantially grown its portfolio of blue-chip clients across the finance & technology, telecoms, and aviation sectors. We bring a fresh and creative approach to our clients across all areas of project and delivery management; this approach resonates with existing and potential clients. As a result of our expanding client base, we are looking for an experienced Security Analyst to join our team.

If you are interested in building something special and want the opportunity to work with a like-minded team, we here at **The Project Foundry** want to work with you.

Our ideal colleague will be self-directed, highly motivated, and comfortable working in an extremely fast-paced environment. If you have experience in managing tickets to triage, analyse and creating remedial steps of action then this may be the role for you.

This is a 6-month daily rate contract role.

Plan
